01 **Product Quality**

7.3/10

Headway leads this dimension at **7.7/10**; RiseGuide sits at **7.3/10** (was 7.3 last week).

Headway improved most this week (+0.5 vs. last week).

RiseGuide **7.3**Liven **5.8** ▲ +0.1Coursiv **7.0** ▲ +0.3Headway **7.7** ▲ +0.5**Marketing vs reality****RISEGUIDE****Watch · 6.5**

The gap between what's promised and what's delivered keeps narrowing on the content side and stays wide on the checkout side. App Store bug and performance complaints continued to resolve this week (now 4.4 and 4.3 stars), and 24 reviews specifically praised how well the lessons fit their use case — up from 16 last week. The reviews that still pair a complaint with 'rehashed information' overwhelmingly lead with a refund grievance, not a content one.

LIVEN**Mixed · 5**

Trustpilot still rewards the CBT wellness positioning, but app-store sentiment is slipping. Bug and slow-performance complaints are increasingly visible — marketed promise diverging from daily-use experience.

COURSIV**Mixed · 5.5**

Beginner-AI lessons land strongly with first-time users — earned the cohort's most concentrated positive cluster. Drag remains deceptive-advertising and pricing complaints from outside the funnel.

HEADWAY**LEADER****Healthy · 7**

Book-summary promise delivered consistently across both stores. Sentiment is net-positive and stable, no new complaint cluster, and YouTube creator coverage is unanimously positive.

Unique value proposition**RISEGUIDE****Healthy · 7.5**

The structured-journey format is now earning unprompted praise at densities the rest of the dataset can't match. 118 App Store reviews this week landed in the 'satisfied users' theme averaging 4.8 stars (up from 113), 25 specifically called the lessons approachable (up from 18), and 24 cited the use case fitting their goal (up from 16). The core experience is the brand's strongest asset and it's compounding.

LIVEN**Watch · 6.5**

The CBT-companion + mood tracker stack is coherent on paper, but reviewers split on whether the AI companion helps or distracts. The differentiator isn't fully landing.

COURSIV**Healthy · 7.5**

Mobile-first AI skill tracks remain clearly differentiated from desktop video-course competitors. Product experience earned the cohort's most concentrated positive sentiment.

HEADWAY**LEADER****Healthy · 8**

Category leader by every measure: scale, feature maturity, review-base depth. No meaningful movement on the differentiation story.

Accessibility & consistency

RISEGUIDE LEADER Healthy · 8 Up from last week. The healing on App Store performance kept going. App Store users mentioned performance 19 times this week (up from 7), averaging 4.3 stars, and bug complaints continued to resolve at 4.4 stars (up from 3.7). What used to be the dimension's biggest standing risk a month ago is now one of its strongest positive signals. The performance scare from a month ago is now a durable strength — App Store mentions of performance nearly tripled this week (19 reviews, up from 7) and the average rating climbed to 4.3 stars from 3.1. Bug complaints resolved to 4.4 stars. The one remaining soft spot is Google Play, where the rating edged down a hair to 4.05 — small enough to call flat, but it's the second week in a row the gap with the App Store has widened.	LIVEN Watch · 6 ▲ +0.5 Aggregate ratings are decent, but the iOS bug cluster is the broadest in cohort relative to volume. ADHD/anxiety customisation gaps remain active.	COURSIV LEADER Healthy · 8 ▲ +1.0 Google Play sentiment is overwhelmingly positive. We don't have visibility into iOS reviews because that app isn't in our tracking tool — this rating reflects Android only.	HEADWAY LEADER Healthy · 8 ▲ +1.5 Aggregate ratings remain strong with a small iOS-Android gap. Structural concern: the support team has stopped replying to iOS reviews entirely. Product consistent; experience around it isn't.
--	--	---	---

02

Customer Service

6.2/10

Coursiv leads this dimension at 6.3/10; RiseGuide sits at 6.2/10 (was 6.2 last week). All four brands held their dimension scores flat this week.

RiseGuide 6.2

Liven 4.0

Coursiv 6.3

Headway 5.2

Support channel availability

RISEGUIDE LEADER Watch · 6 Coverage is unchanged — email and the help portal carry everything, with no live chat or phone tier. What looks like a thin channel mix is being more than compensated for by the human quality of the replies, but the structural gap remains: when volume grows, the same email queue absorbs it. The next investment that would actually move this score is a tooling one, not a hiring one.	LIVEN Mixed · 4.5 Critical structural gap: the team engages actively on Android but doesn't reply to iOS reviews at all. The 'multi-channel support' claim doesn't hold on the largest store.	COURSIV LEADER Watch · 6 Multi-tier support (email, portal, knowledge base) plus active engagement on visible channels. Less visibility on iOS — that app isn't in our tracking tool.	HEADWAY Mixed · 5.5 Same iOS gap as Liven, newly visible: replies on Android but not iOS. Trustpilot's high reply rate was masking it — once Appbot iOS was added, the dead-zone surfaced.
--	--	---	---

Response speed & quality

RISEGUIDE

LEADER

Healthy · 7.5

Up from last week. Customer support went from a side mention to a headline asset this week. App Store reviewers raised customer support 18 times — 4.5 times more often than last week's 4 mentions — averaging 4.7 stars, with reviewers calling it 'unexpectedly excellent' and naming agents by first name. Google Play reflected the same swing, with support mentions tripling from 3 to 8. The reply-quality work is now visible in the language reviewers use.

Support is now the standout positive in the whole scorecard. App Store mentions of customer support more than quadrupled this week (18 reviews at 4.7 stars, up from 4), Google Play mentions tripled (8 reviews, up from 3), and reviewers are now thanking specific agents by name — Jasmine on the App Store this week, Andrew last week. Reviewers used phrases like 'impressed (unexpectedly in truth)' and 'A+++.' The pattern has tipped from invisible to brand-defining.

LIVEN

Mixed · 4

Two-track operation: Android reviewers get steady engagement, iOS reviewers get nothing. Multi-week silence pattern reported by users is now confirmed as structural for iOS.

COURSIV

Watch · 6.5

Where visible, response density is excellent — every Android reviewer gets a reply, including every negative one. iOS visibility gap caps the read at watch-level.

HEADWAY

Mixed · 5.5

Same dual-track problem as Liven, exposed for the first time: Android engagement is total, iOS engagement is zero. Previous high score was Trustpilot-only signal.

Complaint resolution rate

RISEGUIDE

Mixed · 5

The 'every unhappy customer hears back' promise is fully restored across all platforms. App Store and Google Play held at 100% reply coverage on negative reviews, and Trustpilot recovered last week's slip — reply rates returned to 100%. But answering is still not resolving: the historical record of formally closed complaints stays well below the reply rate, and that gap is why the criterion sits where it does despite near-perfect responsiveness.

LIVEN

Critical · 3.5

90% Trustpilot reply to negatives + Android Appbot strong, but iOS reviews accumulate without any response. Refund and bug threads on the largest store are structurally unanswered.

COURSIV

LEADER

Watch · 6.5

100% reply to negative reviews on Trustpilot, but only 63.5% reply rate overall. Selective engagement — they answer negatives when they see them but skip a third of all reviews.

HEADWAY

Mixed · 4.5

90% Trustpilot reply to negatives + 100% Android engagement, but iOS shows the same gap as response-speed: every negative iOS review is now ignored. Apple Communities refund-refusal threads remain active.

03

User Feedback

6.6/10

Coursiv leads this dimension at 8.1/10; RiseGuide sits at 6.6/10 (was 6.6 last week). Liven improved most this week (+0.7 vs. last week).

RiseGuide 6.6

Liven 6.8 ▲ +0.7

Coursiv 8.1 ▲ +0.7

Headway 7.6 ▲ +0.5

Review volume & rating

RISEGUIDE	LIVEN	COURSIV	HEADWAY LEADER
Healthy · 7.6	Healthy · 8.5	Healthy · 8.5	Exceptional · 9
Trustpilot crossed the 20,000-review milestone this week, adding 612 new reviews at a stable 4.4-star average — a 3.1% increase. The App Store added 476 reviews at 4.6 stars, and Google Play added 84 at a slightly slipped 4.05. Volume growth is broad-based across all three platforms and ratings are stable everywhere — a healthier picture than the dashboard tends to show.	Strong cross-platform scale: 27,274 Trustpilot reviews at ★4.13, plus iOS / Android footprints. iOS sentiment meaningfully stronger than Android, but volume itself is meaningful at this scale.	Largest review base in cohort by a wide margin — 133,082 Trustpilot reviews at ★4.58, built up in under a year of operating. Heavily invited (98.0% prompted), but volume itself is a credibility asset.	▼ -0.5 Largest absolute footprint in cohort: 6,398 Trustpilot reviews at ★3.93, plus 115K iOS + 169K Android reviews. Trustpilot rating is the weakest in cohort — 6+ years of accumulation surfaces real friction.

Sentiment & platform consistency

RISEGUIDE

Watch · 6

Up from last week. Google Play recovered from the two-week-old wobble — machine sentiment there climbed back to 80% positive (up from 70 last week), and the negative share fell to 11%. The App Store held steady at 83% positive. The two stores converging again is exactly the consistency this criterion tracks, and it's the first time in a month that's happened.

Google Play sentiment recovered the wobble — machine sentiment there climbed to 80% positive (up from 70 last week) and the negative share fell to 11%. The App Store held at 83% positive. The two stores are converging again instead of diverging, which is the consistency the criterion was downgraded for two weeks ago. Outright dissatisfied mentions also stayed flat at low single digits across both stores.

LIVEN

Healthy · 7

▲ +2.5

Sentiment consistently mediocre across stores — no managed-channel cushion. Fresh App Store sentiment slipped notably, confirming a platform-wide decline rather than channel noise.

COURSIV

LEADER

Healthy · 8

▲ +3.0

Google Play sentiment is overwhelmingly positive — but Reddit is the most negative in the cohort. Sharpest managed-versus-organic gap of any brand. iOS data not available.

HEADWAY

LEADER

Healthy · 8

▲ +2.5

iOS reads moderately positive; Android shows a near-tie between positive and negative. Fresh App Store reviews were notably worse than baseline — the worst fresh signal in the cohort.

Review authenticity signals

RISEGUIDE

Mixed · 4.5

Trustpilot's invited share is now 99% — essentially the entire visible review stream is solicited rather than spontaneous. The one bright spot is that the compliance-label situation stayed clean for a second straight week, with no flagged reviews this cycle. The independent authenticity tracker RealReviews still places RiseGuide mid-pack at 4.4 stars across 86 ratings. The headline numbers are real; the audience producing them is almost entirely a company-selected list.

LIVEN

Healthy · 7

94.0% of Trustpilot reviews are invited — heavier solicitation than RiseGuide but lighter than Coursiv. The iOS reply silence means iOS reviews accumulate untouched — technically more organic on that store, but also a sign of disengagement.

COURSIV

LEADER

Healthy · 8

98.0% of Trustpilot reviews are invited — the heaviest solicitation pattern in the cohort. Massive volume (133K reviews) counterbalanced by a meaningfully positive organic Reddit signal. Volume is the credibility asset; authenticity is the question mark.

HEADWAY

LEADER

Healthy · 8

Only 38.5% of Trustpilot reviews are invited — by far the most organic profile in the cohort. Six-plus years of accumulation produces a naturally diluted invited-share vs the younger heavily-prompted competitors.

Company responsiveness to reviews

RISEGUIDE

LEADER

Healthy · 8.3

Reply coverage is now at 100% on every platform tracked. The App Store and Google Play held at 100% on negative reviews, and Trustpilot recovered last week's slip — the reply rate is back to 100% across the visible sample. With all three platforms simultaneously at full coverage, this is now the cleanest signal in the scorecard.

LIVEN

Mixed · 4.5

Two-track operation: Trustpilot reply at 90.5%, Android Appbot 94%, but iOS reply rate 0%. Previous high score reflected Trustpilot only — once iOS visibility was added, the structural gap became the dominant signal.

COURSIV

Healthy · 8

Trustpilot reply rate 63.5% — the lowest in cohort despite 120K reviews. Google Play reply rate is 100% including all negatives, suggesting selective engagement. iOS visibility gap is the only thing holding the score back further.

HEADWAY

Mixed · 5.5

Previously rated highest in cohort on Trustpilot's reply rate alone (87% on Trustpilot, 90% on negatives). Fuller picture now: Android engagement is total, iOS engagement is zero. Largest single regression in the benchmark.

04

Billing Transparency

3.5/10

Headway leads this dimension at **3.9/10**; RiseGuide sits at **3.5/10** (was 3.5 last week). All four brands held their dimension scores flat this week.

RiseGuide **3.5**Liven **2.9**Coursiv **3.1**Headway **3.9**

Price disclosure

RISEGUIDE LEADER**Mixed · 5**

The two stores are pulling in opposite directions on pricing clarity. App Store pricing mentions doubled to 22 this week and the average rating climbed from 2.0 to 3.4 stars — a meaningful improvement in how users describe the pricing they encounter. Google Play pricing held at 7 mentions but the average dropped from 1.7 to 1.1 stars. The progress on one store is real; the regression on the other is just as real, and the criterion sits flat because they cancel.

LIVEN**Critical · 3.5**

Worst pricing-disclosure exposure in the cohort — pricing complaints reached the largest cluster across all four brands. No homepage pricing; users must complete a quiz to see plans.

COURSIV**Critical · 3.5**

Same quiz-funnel pattern as Liven: no upfront pricing, plans revealed at the end. Trial-to-renewal jump is the dominant friction in third-party complaints.

HEADWAY**Mixed · 4.5**

Second-worst pricing-complaint exposure despite mature operations. Website FAQ links to a pricing article rather than naming prices — a transparency gap hurting otherwise solid first impressions.

Hidden / recurring charges

RISEGUIDE

LEADER

Critical · 2.5

Flat from last week. The complaint pattern shifted shape this week without losing its weight. App Store payment mentions improved (8 reviews, down from 12, averaging 2.9 stars up from 1.3), but Privacy mentions surged from 3 to 11 and Security & Accounts mentions doubled from 5 to 11 — the same subscription-rage users are now framing it as a trust breach rather than a billing one. Google Play payment complaints sit at 1.1 stars (down from 1.5) and Pricing at 1.1 stars (down from 1.7). The label is changing; the substance isn't.

Users still describe being defrauded, not misinformed — and the language this week is even sharper. Google Play reviewers used 'predatory subscription' and 'charged €49.99 without a single notification', and on the App Store the same complaint is migrating from the Payment label to Privacy and Security & Accounts (both topics roughly doubled this week). The explicit 'you will be charged today' confirmation step remains the single highest-leverage fix available.

LIVEN

Critical · 2

Largest billing-flow exposure in cohort. Auto-renewal complaints are widespread across Trustpilot and unmanaged channels. Trial-to-subscription transition isn't clearly signalled — structural, not noise.

COURSIV

Critical · 2

Billing-adjacent complaints come from multiple vectors at once — payment surprises and deceptive-advertising complaints both active. BBB shows billing as the dominant complaint type historically.

HEADWAY

LEADER

Critical · 2.5

Significant billing-flow exposure despite mature operations. The 'HEADWAY APP IS A SCAM' Apple Communities thread persists, and unexpected weekly-premium charges after a 'free trial' remain the dominant Trustpilot 1-star theme.

Ease of cancellation

RISEGUIDE

Mixed · 4.5

The cancellation guide works for the users who reach it — but new reviews still report being trapped: 'I unsubscribed from the app over a month ago and they're still charging me' and 'they were charging me for months from an old account, app couldn't cancel.' The documentation exists; the problem is purely discoverability. Linking the guide from the in-app billing screen and the store listings would move this criterion without writing a word of new content.

LIVEN

Critical · 3.5

iOS support sentiment netted out negative, and combined with the iOS reply silence, users trying to cancel can't reach support on the largest store.

COURSIV

Critical · 3.5

A third-party site publishes a dedicated 'How to Cancel Coursiv' guide — a clear signal that the native flow has enough friction to create a third-party niche.

HEADWAY

LEADER

Watch · 6

Best cancellation infrastructure in cohort: published pre-renewal rule, multiple cancellation paths, no negative support-experience cluster.

UI dark patterns

RISEGUIDE

Critical · 2.3

Trustpilot's compliance-label situation stayed clean for a second straight week — no flagged reviews this cycle. But the underlying pattern the company itself acknowledges in its replies — charging before a stated renewal date, no email receipt — is still generating reviews this week, and the fact that App Store users are now framing the same complaint as a Privacy or Security & Accounts issue suggests the perception is hardening, not fading.

LIVEN

Critical · 2.5

Bug complaints and pricing-flow complaints overlap — the combined cluster is the broadest in cohort. Developer publicly acknowledged manipulative rating prompts but underlying upsell flows still flagged as aggressive.

COURSIV

Critical · 2.5

Deceptive-advertising complaints are a distinctive cohort marker for Coursiv. The quiz-funnel pricing reveal is a textbook dark pattern that consistently surfaces in negative reviews.

HEADWAY

LEADER

Mixed · 4

Lower per-user incidence of dark-pattern complaints than peers. Apple Communities thread about misleading purchase flows persists, but the pattern is softer than what we see at Liven or Coursiv.

Refund policy clarity & enforcement

RISEGUIDE

Critical · 3

Refunds still run on negotiation, not policy. One reviewer thanked an agent for an instant refund this week; another wrote there was 'a lot of back-and-forth, and they tried to bargain with me instead of just processing' the request. With no refund policy published on the website, every refund is a private bargain whose outcome depends on who you reach. A published policy is the cheapest credibility fix in this dimension.

LIVEN

Critical · 3

Claimed 30-day refund policy is enforced inconsistently — some refunds granted, others refused. With the iOS reply silence, refund threads on the largest store are structurally unanswered.

COURSIV

LEADER

Mixed · 4

Public Money-Back Guarantee exists but requires completing most of the program to qualify — excluding most dissatisfied users. The team engages with negatives but enforces the restriction. Documented policy is a transparency floor.

HEADWAY

Critical · 2.5

No public refund policy. Apple Communities and Trustpilot threads about refund refusals on full-year charges are active. With the iOS reply silence, refund threads on iOS are structurally ignored.

05 Brand Trust & Legitimacy**4.5/10**

Headway leads this dimension at **7.1/10**; RiseGuide sits at **4.5/10** (was 4.5 last week). All four brands held their dimension scores flat this week.

RiseGuide **4.5**Liven **6.4**Coursiv **4.6**Headway **7.1****Company age & history****RISEGUIDE****Critical · 3**

Still young in category, and the only fast lever — a credible founder story — still doesn't exist. The company is roughly two years old and the app about six months. Time fixes this eventually, but right now the sole public record of who runs RiseGuide is a name in business-registration filings, which is not the kind of history that builds trust.

LIVEN**Watch · 6**

Around 4.5 years operating — the second-longest track record in cohort after Headway.

COURSIV**Critical · 3**

Under a year operating, despite already having a six-figure review base. Youngest entity in cohort; review-base-to-age ratio is anomalous.

HEADWAY**LEADER****Healthy · 8**

Six-plus years operating with a recent rebrand and publicly announced IPO plans. Most mature company in cohort by both operating history and corporate sophistication.

Legal & brand identity alignment**RISEGUIDE****Mixed · 5.3**

The durable good news held: Trustpilot's compliance labels stayed clean for a second straight week, the main scam-flagging sites stayed out of the top results, and RiseGuide.com owns 6 of the visible first-page slots. The new wrinkle is a skeptical Reddit thread climbing to the #1 position for 'riseguide reviews' searches — worth watching, but it's a curious user, not a fraud accusation.

LIVEN**Watch · 6**

Corporate entity matches the consumer brand on billing and legal pages. Cyprus address publicly listed. Credibility signals in organic search results, no complaint domains ranking.

COURSIV**Mixed · 5**

Corporate entity matches the consumer brand, but search results show a concerning share of complaint pages — a billing-vector concern. No credibility-domain anchors surface.

HEADWAY**LEADER****Healthy · 7**

Corporate entity publicly disclosed on the homepage with US registered address. Legal pages comprehensive across terms, privacy, AI usage. Forbes appears as a credibility anchor; brand-owned domains dominate first-page results.

Third-party recognition

RISEGUIDE

Mixed · 4.7

The brand's best independent endorsement keeps growing but is decelerating — the standout creator review crossed 55,000 views (up from 54,600), and the skeptical 'is it a scam?' video also slowed to 14,400 views (up from 14,000). The catch is the creator-versus-audience split that won't close: across sampled videos 73% were positive, but their comment sections ran only 30% positive. The creators are sold; their viewers are still deciding.

LIVEN

LEADER

Watch · 6

A Board of Health Professionals page lists 15+ named PhDs — a distinctive scientific-credibility signal. YouTube coverage is healthy with almost no complaint-framed videos. Crunchbase appears in search.

COURSIV

LEADER

Watch · 6

Listed on Tracxn and Crunchbase, with broad YouTube creator coverage. But organic search results skew complaint-heavy, and there's no editorial press coverage from Forbes, TechCrunch, or peer outlets.

HEADWAY

Mixed · 4.5

Strongest third-party recognition stack: Wikipedia, Endeavor entrepreneur backing, recurring trade press around IPO plans, and YouTube creator coverage unanimously positive.

Leadership transparency

RISEGUIDE

Critical · 3

Flat from last week. The most fixable score in the scorecard stayed unfixed for another week — no founder bio, no About page, no leadership presence anywhere in this week's search results. It's now the longest-running flat criterion in the report. A 200-word bio with a real photo would lift this 2–3 points and quiet the 'who's behind this?' question across every channel.

The longest-running flat criterion in the report. No founder bio shipped this week, no About page, no leadership presence in any search result. Meanwhile one App Store reviewer this week told future readers to 'search Reddit for REAL reviews' — the kind of advice the brand cannot rebut as long as there is no person to put behind it. A short, photographed founder bio remains the single most fixable lift anywhere in this scorecard.

LIVEN

Healthy · 7

Founder publicly named, and an extensive list of health-professional advisors published by name and credential. Leadership identity transparent and verifiable.

COURSIV

Critical · 3

No founders or executives publicly named anywhere — website, registry filings, or LinkedIn. Anonymous-corporate posture despite a very large customer base — a distinctive cohort outlier.

HEADWAY

LEADER

Healthy · 8

Founder is public with extensive media presence — interviews, Endeavor profile, recurring press around the IPO. Strongest leadership transparency stack in cohort.

Online presence consistency

RISEGUIDE

Watch · 6.3

Up from last week. The brand-controlled footprint on the first page grew this week. RiseGuide-owned domains now occupy 6 of the top 30 search slots (up from 5), and App Store and Google Play listings also gained ground. The improvement is real but thin — community-presence growth came almost entirely from Reddit threads asking 'is this legit?', so visibility went up while the tone of that visibility stayed mixed.

Where the brand controls the message it's perfectly aligned — the same support contacts appear across the website, both app stores, Trustpilot and business directories, and RiseGuide-owned domains gained a SERP slot this week (now 6, up from 5). The gap is community presence: Reddit visibility is rising fastest of all (6 first-page slots, up from 4), but it skews to skeptical inquiry, which underlines how thin the brand's own community footprint is against an install base above 100,000.

LIVEN

Healthy · 7

Consistent branding across web, app stores, and Trustpilot. Official Health Professional Board page reinforces brand identity. Corporate address publicly displayed.

COURSIV

Watch · 6

Branding consistent across visible channels, but corporate and leadership data largely absent — undermines coherence at the trust layer. Organic search shows a concerning complaint-page share.

HEADWAY

LEADER

Healthy · 8

Wikipedia, Crunchbase, official About-us, press coverage, and store listings all reinforce the same brand and corporate identity. Search results contain the broadest unique-domain set in cohort.

3 IDEAS · NEXT WEEK

Initiatives that would lift the score

01 Publish an About-us page with founder bio

LIFTS: LEADERSHIP TRANSPARENCY · 3.0 → ~5 · Single content page — one photo, four links. Ship by Friday.

Liven publicly names CEO Shahrooz Chowdhury + 15 PhD advisors — scores 7. Headway publicly names founder Anton Pavlovsky with press coverage — scores 8.

How to ship

- 1 Commission a clean headshot of Oleksandr Matsiuk + draft a 2-paragraph bio (background + why RiseGuide exists)
- 2 Publish at riseguide.com/about with photo, bio, and a LinkedIn link
- 3 Link the page from the homepage footer and the App Store / Google Play developer pages

02 Publish an explicit refund + cancellation policy

LIFTS: REFUND POLICY 3.0 → 4+ · EASE OF CANCELLATION 4.3 → 5+ · Policy page + reply templates — text only, no engineering. Ship by Wednesday.

Headway's published 24-hour pre-renewal rule anchors their 6.0 score on cancellation (best in cohort). Coursiv's public Money-Back Guarantee anchors their 4.0 on refund policy.

How to ship

- 1 Write a 1-page policy: **7-day no-questions refund + 24-hour pre-renewal cancel rule**
- 2 Publish at riseguide.com/refunds, link from the footer and every billing email
- 3 Update support reply templates + cross-link from in-app billing + store descriptions

03 Publish a 'How your subscription works' explainer

LIFTS: HIDDEN CHARGES 2.0 → 3+ · PRICE DISCLOSURE 5.0 → 6+ · Support article + email-template update. Text-only, no engineering, no funnel impact. Ship by Wednesday.

Reviewers report surprise at the first payment amount, but the underlying model (introductory discount, then renewal at full price) is industry-standard. The complaint is about clarity of communication, not the pricing itself.

How to ship

- 1 Write a plain-English article: **introductory price + when full price kicks in + how to cancel**
- 2 Publish at support.riseguide.com/how-pricing-works, link from every billing email + App Store description
- 3 Update support reply templates to cite the article URL on every billing-surprise thread
