The bite-sized lesson promise holds; reviewers consistently praise the format. The only gap is an emerging iOS performance issue — first time it's surfaced at scale.

LIVEN**Mixed · 5**

▼ -1.0

A new wave of iOS bug complaints emerged — a complaint category that wasn't visible last week.

Trustpilot still rewards the CBT wellness positioning, but app-store sentiment is slipping. Bug and slow-performance complaints are increasingly visible — marketed promise diverging from daily-use experience.

COURSIV**Mixed · 5.5**

▲ +0.5

Product-experience sentiment rose sharply — beginner-AI lessons earned the cohort's most concentrated positive cluster.

Beginner-AI lessons land strongly with first-time users — earned the cohort's most concentrated positive cluster. Drag remains deceptive-advertising and pricing complaints from outside the funnel.

HEADWAY**LEADER****Healthy · 7**

Book-summary promise delivered consistently across both stores. Sentiment is net-positive and stable, no new complaint cluster, and YouTube creator coverage is unanimously positive.

Unique value proposition**RISEGUIDE****Healthy · 7.3**

The Journey lesson format earned its strongest endorsement in our tracking window — reviewers explicitly cite the structured approach.

The structured Journey format is the clearest differentiator — reviewers call it out, and it earned the strongest single product-feature endorsement we've tracked. Productivity-app Reddit threads surface RiseGuide as distinct.

LIVEN**Watch · 6.5**

▼ -0.5

Sentiment on the AI companion (Liven's flagship differentiator) is now visibly split — the core moat is weakening.

The CBT-companion + mood tracker stack is coherent on paper, but reviewers split on whether the AI companion helps or distracts. The differentiator isn't fully landing.

COURSIV**Healthy · 7.5**

▲ +0.5

Beginner-AI positioning is increasingly validated — Coursiv earned the cohort's strongest single product-feature endorsement.

Mobile-first AI skill tracks remain clearly differentiated from desktop video-course competitors. Product experience earned the cohort's most concentrated positive sentiment.

HEADWAY**LEADER****Healthy · 8**

Category leader by every measure: scale, feature maturity, review-base depth. No meaningful movement on the differentiation story.

Accessibility & consistency

RISEGUIDE Watch · 6.5 ▼ -0.5 A new cluster of iOS performance complaints emerged — first time crossing the threshold for attention. Aggregate ratings hold and the app is broadly stable. New concern: a distinct cluster of iOS performance complaints — first time it's crossed the threshold for attention.	LIVEN Mixed · 5.5 ▼ -0.5 The iOS bug-complaint cluster expanded — now the broadest in cohort relative to volume. Aggregate ratings are decent, but the iOS bug cluster is the broadest in cohort relative to volume. ADHD/anxiety customisation gaps remain active.	COURSIV LEADER Healthy · 7 ▼ -1.0 Score softened because we don't have Coursiv iOS in tracking — visibility gap, not product regression. Google Play sentiment is overwhelmingly positive. We don't have visibility into iOS reviews because that app isn't in our tracking tool — this rating reflects Android only.	HEADWAY Watch · 6.5 ▼ -1.5 Product still stable; experience around it slipped. Support team has stopped replying to iOS reviews entirely. Aggregate ratings remain strong with a small iOS-Android gap. Support channel availability

RISEGUIDE LEADER

Watch · 6

▲ +1.0

Reply density tightened across both stores — the support claim now holds operationally, not just on paper.

Email and Trustpilot remain the only channels — no chat or phone. Response density is exceptional: every iOS reviewer gets a reply, Trustpilot replies in minutes.

LIVEN

Mixed · 4.5

▼ -1.5

The iOS support channel went structurally silent — zero replies on 100 sampled iOS reviews while Android stayed strong.

Critical structural gap: the team engages actively on Android but doesn't reply to iOS reviews at all. The 'multi-channel support' claim doesn't hold on the largest store.

COURSIV

LEADER

Watch · 6

▼ -1.0

Score softened because Coursiv iOS isn't in our tracking subscription — visibility gap, not support regression.

Multi-tier support (email, portal, knowledge base) plus active engagement on visible channels. Less visibility on iOS — that app isn't in our tracking tool.

HEADWAY

Mixed · 5.5

▼ -1.5

Same iOS reply gap as Liven became visible. Trustpilot's high reply rate had been masking it.

Same iOS gap as Liven, newly visible: replies on Android but not iOS. Trustpilot's high reply rate was masking it — once Appbot iOS was added, the dead-zone surfaced.

Response speed & quality

RISEGUIDE

Watch · 6

▲ +1.0

Reply density became the strongest signal in the cohort — every iOS reviewer is now answered.

Best response density in the cohort — every iOS reviewer answered, Android coverage solid, Trustpilot replies in minutes. Billing-complaint reply text still templated, but breadth is the strongest signal cohort-wide.

LIVEN

Mixed · 4

▼ -1.0

iOS support dead-zone is now confirmed as structural — zero replies for the second source of measurement.

Two-track operation: Android reviewers get steady engagement, iOS reviewers get nothing. Multi-week silence pattern reported by users is now confirmed as structural for iOS.

COURSIV

LEADER

Watch · 6.5

▼ -0.5

Same visibility caveat — the read is incomplete on the iOS side, not declining.

Where visible, response density is excellent — every Android reviewer gets a reply, including every negative one. iOS visibility gap caps the read at watch-level.

HEADWAY

Mixed · 5.5

▼ -1.5

Largest single regression in the benchmark. Appbot exposed an iOS reply gap that Trustpilot's 98% rate was hiding.

Same dual-track problem as Liven, exposed for the first time: Android engagement is total, iOS engagement is zero. Previous high score was Trustpilot-only signal.

Complaint resolution rate

RISEGUIDE Mixed · 4.5 ▲ +1.5 Every negative review across every monitored channel got a reply — a much broader signal than BBB's 15% formal-resolution rate suggested. Meaningful improvement: 100% Trustpilot reply rate to negative reviews (was BBB's 15% formal-resolution rate previously). Combined with 100% iOS and 95% Android negative-reply coverage — every negative review across every monitored channel now gets a reply.	LIVEN Critical · 3.5 ▼ -0.5 Negative iOS reviews now accumulate without response — refund and bug threads are structurally unanswered. 90% Trustpilot reply to negatives + Android Appbot strong, but iOS reviews accumulate without any response. Review volume & rating

RISEGUIDE

Healthy · 7.3

▲ +0.3

Volume crossed +2% week-over-week on Trustpilot while ratings stayed firm.

Volume growing healthily on Trustpilot with stable ratings, and the cross-platform footprint is solid. Both volume and rating trajectory pointed up — a clean signal.

LIVEN

Healthy · 8.5

Strong cross-platform scale: 23,636 Trustpilot reviews at ★4.06, plus iOS / Android footprints. iOS sentiment meaningfully stronger than Android, but volume itself is meaningful at this scale.

COURSIV

Healthy · 8.5

Largest review base in cohort by a wide margin — 120,395 Trustpilot reviews at ★4.56, built up in under a year of operating. Heavily invited (99.5% prompted), but volume itself is a credibility asset.

HEADWAY

LEADER

Exceptional · 9.5

Largest absolute footprint in cohort: 6,229 Trustpilot reviews at ★3.93, plus 115K iOS + 169K Android reviews. Trustpilot rating is the weakest in cohort — 6+ years of accumulation surfaces real friction.

Sentiment & platform consistency

RISEGUIDE

Mixed · 5

Sentiment is platform-bound — managed channels positive, organic Google Play meaningfully softer. Fresh App Store reviews were net-positive. Reddit chatter mostly neutral.

LIVEN

Mixed · 4.5

▼ -0.6

Fresh App Store sentiment slipped meaningfully — confirming a platform-wide decline rather than channel noise.

Sentiment consistently mediocre across stores — no managed-channel cushion. Fresh App Store sentiment slipped notably, confirming a platform-wide decline rather than channel noise.

COURSIV

Mixed · 5

▲ +0.1

Google Play sentiment is overwhelmingly positive — but Reddit is the most negative in the cohort. Sharpest managed-versus-organic gap of any brand. iOS data not available.

HEADWAY

LEADER

Mixed · 5.5

▼ -1.5

Fresh App Store reviews were the worst fresh signal across all four brands.

iOS reads moderately positive; Android shows a near-tie between positive and negative. Fresh App Store reviews were notably worse than baseline — the worst fresh signal in the cohort.

Review authenticity signals

RISEGUIDE

Mixed · 5.5

84% of Trustpilot reviews come from prompted invitations rather than spontaneous customer posts. Independent authenticity ranking puts RiseGuide in the lower-mid range. Heavy solicitation pattern in the managed channel.

LIVEN

Healthy · 7

97% of Trustpilot reviews are invited — heavier solicitation than RiseGuide but lighter than Coursiv. The iOS reply silence means iOS reviews accumulate untouched — technically more organic on that store, but also a sign of disengagement.

COURSIV

LEADER

Healthy · 8

▼ -1.0

119K Trustpilot volume is now read against an organic Reddit baseline — recalibrated against more sources.

99.5% of Trustpilot reviews are invited — the heaviest solicitation pattern in the cohort. Massive volume (120K reviews) counterbalanced by a meaningfully positive organic Reddit signal. Volume is the credibility asset; authenticity is the question mark.

HEADWAY

LEADER

Healthy · 8

Only 50.5% of Trustpilot reviews are invited — by far the most organic profile in the cohort. Six-plus years of accumulation produces a naturally diluted invited-share vs the younger heavily-prompted competitors.

Company responsiveness to reviews

RISEGUIDE

LEADER

Healthy · 8.5

▲ +1.5

Cross-platform reply density became the strongest engagement signal in the cohort.

Strongest engagement signal in the cohort — 100% Trustpilot reply rate (200/200 sampled) including 100% on negative reviews, plus iOS at 100% and Android at 77% reply density. Same-day timing confirmed across platforms.

LIVEN

Mixed · 4.5

▼ -2.5

Once iOS data was added, the structural reply gap surfaced — previous score reflected Trustpilot only.

Two-track operation: Trustpilot reply at 90.5%, Android Appbot 94%, but iOS reply rate 0%. Previous high score reflected Trustpilot only — once iOS visibility was added, the structural gap became the dominant signal.

COURSIV

Healthy · 8

Trustpilot reply rate 63.5% — the lowest in cohort despite 120K reviews. Google Play reply rate is 100% including all negatives, suggesting selective engagement. iOS visibility gap is the only thing holding the score back further.

HEADWAY

Mixed · 5.5

▼ -3.5

Largest single regression in the benchmark. The iOS reply dead-zone is now visible.

Previously rated highest in cohort on Trustpilot's reply rate alone (87% on Trustpilot, 90% on negatives). Fuller picture now: Android engagement is total, iOS engagement is zero. Largest single regression in the benchmark.

Price disclosure

RISEGUIDE

The cancellation guide is now indexed and cited by reviewers — the first concrete pricing-transparency improvement in six months.

Pricing clearly disclosed on the App Store, and the cancellation guide is now indexed and cited by reviewers — a real transparency step forward. Onboarding-flow pricing surprises remain a persistent complaint.

LIVEN

Critical · 3.5

▼ -0.5

Pricing-complaint volume is the largest cluster across all four brands. Quiz-funnel pricing reveal hurts first impressions on both stores.

Worst pricing-disclosure exposure in the cohort — pricing complaints reached the largest cluster across all four brands. No homepage pricing; users must complete a quiz to see plans.

COURSIV

Critical · 3.5

▼ -0.5

Trial-to-renewal jump is now visibly hurting first impressions in complaint volume.

Same quiz-funnel pattern as Liven: no upfront pricing, plans revealed at the end. Trial-to-renewal jump is the dominant friction in third-party complaints.

HEADWAY

Mixed · 4.5

▼ -0.5

Website's price obfuscation is visibly hurting first impressions — second-worst pricing-complaint exposure in cohort.

Second-worst pricing-complaint exposure despite mature operations. Website FAQ links to a pricing article rather than naming prices — a transparency gap hurting otherwise solid first impressions.

Hidden / recurring charges

RISEGUIDE

Critical · 2

Every payment-related review was negative — billing-flow exposure remains the rate-limiting factor on the overall score. The 'Continue' charge-trigger has been publicly acknowledged but isn't fixed.

LIVEN

Critical · 2

▼ -1.0

Billing-flow exposure is the largest cluster across all four brands.

Largest billing-flow exposure in cohort. Auto-renewal complaints are widespread across Trustpilot and unmanaged channels. Trial-to-subscription transition isn't clearly signalled — structural, not noise.

COURSIV

Critical · 2

Billing-adjacent complaints come from multiple vectors at once — payment surprises and deceptive-advertising complaints both active. BBB shows billing as the dominant complaint type historically.

HEADWAY

LEADER

Critical · 2.5

▼ -0.5

Billing-complaint volume confirms the trial-to-charge friction is unresolved despite mature operations.

Significant billing-flow exposure despite mature operations. The 'HEADWAY APP IS A SCAM' Apple Communities thread persists, and unexpected weekly-premium charges after a 'free trial' remain the dominant Trustpilot 1-star theme.

Ease of cancellation

RISEGUIDE

Mixed · 4.3

▲ +0.3

First positive movement on cancellation in our tracking: reviewers now explicitly cite the riseguide.com/cancel guide as the path that worked. No native in-app cancellation yet — but the guide is working for those who find it.

LIVEN

Critical · 3.5

▼ -0.5

Cancellation friction now compounds with iOS reply silence — users who can't cancel can't reach support either.

iOS support sentiment netted out negative, and combined with the iOS reply silence, users trying to cancel can't reach support on the largest store.

COURSIV

Critical · 3.5

▼ -0.5

Score softened because we can't observe Coursiv's iOS support sentiment — our blind spot, not a Coursiv regression.

A third-party site publishes a dedicated 'How to Cancel Coursiv' guide — a clear signal that the native flow has enough friction to create a third-party niche.

HEADWAY

LEADER

Watch · 6

Best cancellation infrastructure in cohort: published pre-renewal rule, multiple cancellation paths, no negative support-experience cluster.

UI dark patterns

RISEGUIDE

Critical · 2

The 'Continue' charge-trigger has been publicly acknowledged by support but isn't fixed. Pricing-flow complaints persist. Two Trustpilot reviews were flagged for compliance issues for the first time.

LIVEN

Critical · 2.5

▼ -0.5

Combined UI + pricing complaint cluster expanded to the broadest in cohort.

Bug complaints and pricing-flow complaints overlap — the combined cluster is the broadest in cohort. Developer publicly acknowledged manipulative rating prompts but underlying upsell flows still flagged as aggressive.

COURSIV

Critical · 2.5

▼ -0.5

Deceptive-advertising complaints are increasingly visible — a distinctive Coursiv complaint vector.

Deceptive-advertising complaints are a distinctive cohort marker for Coursiv. The quiz-funnel pricing reveal is a textbook dark pattern that consistently surfaces in negative reviews.

HEADWAY

LEADER

Mixed · 4

Lower per-user incidence of dark-pattern complaints than peers. Apple Communities thread about misleading purchase flows persists, but the pattern is softer than what we see at Liven or Coursiv.

Refund policy clarity & enforcement

RISEGUIDE

Critical · 3

▲ +1.0

Refund-flow mentions are now net-positive on iOS — first non-escalated refund signal in six months.

Every negative Trustpilot review sampled received a reply, and reviewer references to the refund flow are now net-positive on iOS. A proactive full refund was processed historically. Policy still isn't published on the website.

LIVEN

Critical · 3

Claimed 30-day refund policy is enforced inconsistently — some refunds granted, others refused. With the iOS reply silence, refund threads on the largest store are structurally unanswered.

COURSIV

LEADER

Mixed · 4

Public Money-Back Guarantee exists but requires completing most of the program to qualify — excluding most dissatisfied users. The team engages with negatives but enforces the restriction. Documented policy is a transparency floor.

HEADWAY

Critical · 2.5

▼ -0.5

iOS refund threads are structurally unanswered, and no public policy exists to anchor expectations.

No public refund policy. Apple Communities and Trustpilot threads about refund refusals on full-year charges are active. With the iOS reply silence, refund threads on iOS are structurally ignored.

LIVEN

Watch · 6

Around 4.5 years operating — the second-longest track record in cohort after Headway.

COURSIV

Under a year operating, despite already having a six-figure review base. Youngest entity in cohort; review-base-to-age ratio is anomalous.

HEADWAY

Healthy · 8

Six-plus years operating with a recent rebrand and publicly announced IPO plans. Most mature company in cohort by both operating history and corporate sophistication.

Legal & brand identity alignment

RISEGUIDE

RiseGuide-owned domains now occupy 10 of 20 first-page Google results, and Scam Detector dropped out of top-10 results.

Legal, cancellation, and refund pages all publicly accessible. RiseGuide-owned domains now dominate first-page Google results, and the Scam Detector listing dropped out of top results. The LasVegasNV billing-entity mismatch is the standing drag.

LIVEN

Watch · 6

Corporate entity matches the consumer brand on billing and legal pages. Cyprus address publicly listed. Credibility signals in organic search results, no complaint domains ranking.

COURSIV

Mixed · 5

Corporate entity matches the consumer brand, but search results show a concerning share of complaint pages — a billing-vector concern. No credibility-domain anchors surface.

HEADWAY

Creator coverage on YouTube is now unanimously positive, and Forbes appears as a search credibility anchor.

Strongest third-party recognition stack: Wikipedia, Endeavor entrepreneur backing, recurring trade press around IPO plans, and YouTube creator coverage unanimously positive.

Leadership transparency

RISEGUIDE

Critical · 3

Founder named in registry records but has no public profile, no About-us page, no LinkedIn presence, no media interviews in our scan. Name exists, public profile does not.

LIVEN

Healthy · 7

Founder publicly named, and an extensive list of health-professional advisors published by name and credential. Leadership identity transparent and verifiable.

Initiatives that would lift the score

01 Publish an About-us page with founder bio

LIFTS: LEADERSHIP TRANSPARENCY · 3.0 → ~5 · Single content page — one photo, four links. Ship by Friday.

Liven publicly names CEO Shahrooz Chowdhury + 15 PhD advisors — scores 7. Headway publicly names founder Anton Pavlovsky with press coverage — scores 8.

How to ship

- 1 Commission a clean headshot of Oleksandr Matsiuk + draft a 2-paragraph bio (background + why RiseGuide exists)
- 2 Publish at riseguide.com/about with photo, bio, and a LinkedIn link
- 3 Link the page from the homepage footer and the App Store / Google Play developer pages

02 Publish an explicit refund + cancellation policy

LIFTS: REFUND POLICY 3.0 → 4+ · EASE OF CANCELLATION 4.3 → 5+ · Policy page + reply templates — text only, no engineering. Ship by Wednesday.

Headway's published 24-hour pre-renewal rule anchors their 6.0 score on cancellation (best in cohort). Coursiv's public Money-Back Guarantee anchors their 4.0 on refund policy.

How to ship

- 1 Write a 1-page policy: **7-day no-questions refund + 24-hour pre-renewal cancel rule**
- 2 Publish at riseguide.com/refunds, link from the footer and every billing email
- 3 Update support reply templates + cross-link from in-app billing + store descriptions

03 Publish a 'How your subscription works' explainer

LIFTS: HIDDEN CHARGES 2.0 → 3+ · PRICE DISCLOSURE 5.0 → 6+ · Support article + email-template update. Text-only, no engineering, no funnel impact. Ship by Wednesday.

Reviewers report surprise at the first payment amount, but the underlying model (introductory discount, then renewal at full price) is industry-standard. The complaint is about clarity of communication, not the pricing itself.

How to ship

- 1 Write a plain-English article: **introductory price + when full price kicks in + how to cancel**
- 2 Publish at support.riseguide.com/how-pricing-works, link from every billing email + App Store description
- 3 Update support reply templates to cite the article URL on every billing-surprise thread
