Marketing vs reality

RISEGUIDE	LIVEN	COURSIV	HEADWAY LEADER
Watch · 6.3	Mixed · 5	Mixed · 5.5	Healthy · 7
The gap between what's promised and what's delivered has narrowed to a billing problem, not a product one. App Store bug complaints resolved this week (now 4.3 stars, up from 3.6) and performance steadied. The remaining negative reviews pair refund anger with a throwaway 'rehashed information' line — the complaint is about being charged, not about the learning content itself.	Trustpilot still rewards the CBT wellness positioning, but app-store sentiment is slipping. Bug and slow-performance complaints are increasingly visible — marketed promise diverging from daily-use experience.	Beginner-AI lessons land strongly with first-time users — earned the cohort's most concentrated positive cluster. Drag remains deceptive-advertising and pricing complaints from outside the funnel.	Book-summary promise delivered consistently across both stores. Sentiment is net-positive and stable, no new complaint cluster, and YouTube creator coverage is unanimously positive.

Unique value proposition

RISEGUIDE	LIVEN	COURSIV	HEADWAY LEADER
Healthy · 7.3	Watch · 6.5	Healthy · 7.5	Healthy · 8
The structured-journey format keeps earning unprompted praise at a density nothing else in the data matches. 70 App Store reviews this week landed in the 'satisfied users' theme averaging 4.8 stars (up from 63 last week), 13 specifically praised how approachable the format is, and design drew 12 mentions at 4.8 stars. The core experience is the asset; the friction is everywhere around it.	The CBT-companion + mood tracker stack is coherent on paper, but reviewers split on whether the AI companion helps or distracts. The differentiator isn't fully landing.	Mobile-first AI skill tracks remain clearly differentiated from desktop video-course competitors. Product experience earned the cohort's most concentrated positive sentiment.	Category leader by every measure: scale, feature maturity, review-base depth. No meaningful movement on the differentiation story.

Accessibility & consistency

RISEGUIDE Healthy · 7.8 Up from last week. The performance topic that triggered last month's scare is now a positive signal, not a negative one. More App Store users mentioned performance this week (10, up from 7) but they rated it well — 3.8 stars on average, up from 3.0. Bug complaints resolved in the same direction, now averaging 4.3 stars. The thing we were watching healed on its own. The performance worry from last month is now a strength — App Store users mention it more (10 reviews, up from 7) yet rate it 3.8 stars, up from 3.0, and bugs resolved to 4.3. Ratings hold steady where the brand is strongest (Trustpilot 4.4, App Store 4.6). The one soft spot is Google Play, where the average slipped to 4.1 for the second week running.	LIVEN Watch · 6 ▲ +0.5 Aggregate ratings are decent, but the iOS bug cluster is the broadest in cohort relative to volume. ADHD/anxiety customisation gaps remain active.	COURSIV LEADER Healthy · 8 ▲ +1.0 Google Play sentiment is overwhelmingly positive. We don't have visibility into iOS reviews because that app isn't in our tracking tool — this rating reflects Android only.	HEADWAY LEADER Healthy · 8 ▲ +1.5 Aggregate ratings remain strong with a small iOS-Android gap. Structural concern: the support team has stopped replying to iOS reviews entirely. Product consistent; experience around it isn't.
---	--	--	--

02 Customer Service**5.7/10**

Coursiv leads this dimension at **6.3/10**; RiseGuide sits at **5.7/10** (was 5.7 last week). All four brands held their dimension scores flat this week.

RiseGuide **5.7**Liven **4.0**Coursiv **6.3**Headway **5.2****Support channel availability****RISEGUIDE** LEADER**Watch · 6**

Coverage is unchanged — email and the help portal carry everything, with no live chat or phone tier. The exceptional reply density is happening through manual effort, not tooling, which means the real question isn't which channels exist but how far the team can scale this hands-on approach before volume becomes the bottleneck.

LIVEN**Mixed · 4.5**

Critical structural gap: the team engages actively on Android but doesn't reply to iOS reviews at all. The 'multi-channel support' claim doesn't hold on the largest store.

COURSIV

LEADER

Watch · 6

Multi-tier support (email, portal, knowledge base) plus active engagement on visible channels. Less visibility on iOS — that app isn't in our tracking tool.

HEADWAY**Mixed · 5.5**

Same iOS gap as Liven, newly visible: replies on Android but not iOS. Trustpilot's high reply rate was masking it — once Appbot iOS was added, the dead-zone surfaced.

Response speed & quality**RISEGUIDE** LEADER**Watch · 6.5**

Support has become something reviewers single out by name. The customer-support theme grew to 16 App Store mentions this week (up from 14) at 4.3 stars, and reviews now thank specific agents — one wrote that 'Andrew helped me instantly' with a refund. The reply-quality work the team has invested in is showing up as named, personal endorsements.

LIVEN**Mixed · 4**

Two-track operation: Android reviewers get steady engagement, iOS reviewers get nothing. Multi-week silence pattern reported by users is now confirmed as structural for iOS.

COURSIV

LEADER

Watch · 6.5

Where visible, response density is excellent — every Android reviewer gets a reply, including every negative one. iOS visibility gap caps the read at watch-level.

HEADWAY**Mixed · 5.5**

Same dual-track problem as Liven, exposed for the first time: Android engagement is total, iOS engagement is zero. Previous high score was Trustpilot-only signal.

Complaint resolution rate

RISEGUIDE

Mixed · 4.5

Up from last week. The reply streak is back. Both app stores answered 100% of their negative reviews this week — the App Store closed the single gap that broke the run last week (it had left one negative review unanswered), and Google Play held its full coverage. The credibility of 'every unhappy customer hears back' is restored.

The 'every unhappy customer hears back' promise is fully restored — both app stores replied to 100% of negative reviews this week, with the App Store closing last week's lone gap. But answering is not resolving: the historical formal-resolution record stays far below the reply rate, and that gap is why this criterion sits where it does despite near-perfect responsiveness.

LIVEN

Critical · 3.5

90% Trustpilot reply to negatives + Android Appbot strong, but iOS reviews accumulate without any response. Refund and bug threads on the largest store are structurally unanswered.

COURSIV

LEADER

Watch · 6.5

100% reply to negative reviews on Trustpilot, but only 63.5% reply rate overall. Selective engagement — they answer negatives when they see them but skip a third of all reviews.

HEADWAY

Mixed · 4.5

90% Trustpilot reply to negatives + 100% Android engagement, but iOS shows the same gap as response-speed: every negative iOS review is now ignored. Apple Communities refund-refusal threads remain active.

03

User Feedback

6.3/10

Coursiv leads this dimension at 8.1/10; RiseGuide sits at 6.3/10 (was 6.3 last week). Liven improved most this week (+0.7 vs. last week).

Review volume & rating

RISEGUIDE Healthy · 7.3 Volume growth is healthy in aggregate — but the blended number hides a real split. Trustpilot added 437 reviews this week (a 2.5% increase) at a stable 4.4 stars, and the App Store added 331 at 4.6. Google Play added just 39 and its average slipped to 4.1 — down for the second week in a row. The headline grows while the weakest store quietly erodes.	LIVEN Healthy · 8.5 Strong cross-platform scale: 26,313 Trustpilot reviews at ★4.11, plus iOS / Android footprints. iOS sentiment meaningfully stronger than Android, but volume itself is meaningful at this scale.	COURSIV Healthy · 8.5 Largest review base in cohort by a wide margin — 130,182 Trustpilot reviews at ★4.58, built up in under a year of operating. Heavily invited (99.0% prompted), but volume itself is a credibility asset.	HEADWAY LEADER Exceptional · 9 ▼ -0.5 Largest absolute footprint in cohort: 6,333 Trustpilot reviews at ★3.93, plus 115K iOS + 169K Android reviews. Trustpilot rating is the weakest in cohort — 6+ years of accumulation surfaces real friction.
--	---	---	---

Sentiment & platform consistency

RISEGUIDE

Mixed · 5.5

Down from last week. Last week's quarter-record positive swing reversed, and Google Play drove almost all of it — machine sentiment there fell from 82% positive to 61% in one week, with negative reviews jumping to 29%. The App Store cooled only slightly. The two stores are pulling apart again, which is exactly the consistency problem this criterion tracks.

The record positive spike was a single-week event and has now reversed, almost entirely on Google Play, where machine sentiment dropped from 82% positive to 61% and negative reviews rose to 29%. The silver lining: the lost positives moved to neutral, not to anger — outright dissatisfied mentions fell again, to just 4 across both stores. This is a confidence wobble, not a revolt.

LIVEN

Healthy · 7

▲ +2.5

Sentiment consistently mediocre across stores — no managed-channel cushion. Fresh App Store sentiment slipped notably, confirming a platform-wide decline rather than channel noise.

COURSIV

LEADER

Healthy · 8

▲ +3.0

Google Play sentiment is overwhelmingly positive — but Reddit is the most negative in the cohort. Sharpest managed-versus-organic gap of any brand. iOS data not available.

HEADWAY

LEADER

Healthy · 8

▲ +2.5

iOS reads moderately positive; Android shows a near-tie between positive and negative. Fresh App Store reviews were notably worse than baseline — the worst fresh signal in the cohort.

Review authenticity signals

RISEGUIDE

Mixed · 4.5

The share of Trustpilot reviews that came from company invitations is now 98% — essentially the entire visible review stream is solicited rather than spontaneous. The one bright spot: one of the two reviews Trustpilot's own compliance team had flagged has cleared, leaving one. The independent authenticity tracker RealReviews still places RiseGuide mid-pack at 4.3 stars. The rating is real; the audience producing it is almost entirely a company-selected list.

LIVEN

Healthy · 7

95.0% of Trustpilot reviews are invited — heavier solicitation than RiseGuide but lighter than Coursiv. The iOS reply silence means iOS reviews accumulate untouched — technically more organic on that store, but also a sign of disengagement.

COURSIV

LEADER

Healthy · 8

99.0% of Trustpilot reviews are invited — the heaviest solicitation pattern in the cohort. Massive volume (130K reviews) counterbalanced by a meaningfully positive organic Reddit signal. Volume is the credibility asset; authenticity is the question mark.

HEADWAY

LEADER

Healthy · 8

Only 38.5% of Trustpilot reviews are invited — by far the most organic profile in the cohort. Six-plus years of accumulation produces a naturally diluted invited-share vs the younger heavily-prompted competitors.

Company responsiveness to reviews

RISEGUIDE LEADER Healthy · 8 Still the scorecard's standout — both app stores answered 100% of negative reviews this week and the App Store recovered last week's miss. But the responsiveness risk didn't vanish, it moved: Trustpilot slipped for the first time, answering 8 of 9 negative reviews and dropping overall reply coverage to 93%. Worth catching before it becomes the new pattern.	LIVEN Mixed · 4.5 Two-track operation: Trustpilot reply at 90.5%, Android Appbot 94%, but iOS reply rate 0%. Previous high score reflected Trustpilot only — once iOS visibility was added, the structural gap became the dominant signal.	COURSIV LEADER Healthy · 8 Trustpilot reply rate 63.5% — the lowest in cohort despite 120K reviews. Google Play reply rate is 100% including all negatives, suggesting selective engagement. iOS visibility gap is the only thing holding the score back further.	HEADWAY Mixed · 5.5 Previously rated highest in cohort on Trustpilot's reply rate alone (87% on Trustpilot, 90% on negatives). Fuller picture now: Android engagement is total, iOS engagement is zero. Largest single regression in the benchmark.
---	--	---	---

04 **Billing Transparency**

3.5/10

Headway leads this dimension at **3.9/10**; RiseGuide sits at **3.5/10** (was 3.5 last week). All four brands held their dimension scores flat this week.

RiseGuide **3.5**Liven **2.9**Coursiv **3.1**Headway **3.9****Price disclosure****RISEGUIDE** **LEADER****Mixed · 5**

Down from last week. Last week's pricing-message win didn't generalise — it was App Store-only, and Google Play reversed it. Google Play pricing complaints snapped back to rock-bottom 1.0 stars this week (6 reviews, every one negative), erasing the prior week's climb to 2.3. The progress was real but it lived on one store; the other store undid it.

The pricing-clarity gain was App Store-only and Google Play reversed it this week. Google Play pricing complaints dropped back to 1.0 stars (6 reviews, all negative) after climbing to 2.3 last week, while App Store pricing held around 2.3 across 13 mentions. One store is slowly improving; the other just gave back a month of progress, which is why the overall picture stalled rather than advanced.

LIVEN**Critical · 3.5**

Worst pricing-disclosure exposure in the cohort — pricing complaints reached the largest cluster across all four brands. No homepage pricing; users must complete a quiz to see plans.

COURSIV**Critical · 3.5**

Same quiz-funnel pattern as Liven: no upfront pricing, plans revealed at the end. Trial-to-renewal jump is the dominant friction in third-party complaints.

HEADWAY**Mixed · 4.5**

Second-worst pricing-complaint exposure despite mature operations. Website FAQ links to a pricing article rather than naming prices — a transparency gap hurting otherwise solid first impressions.

Hidden / recurring charges

RISEGUIDE LEADER

Critical · 2.5

Users feel defrauded, not misinformed — and the specifics are damning. This week's reviews describe being 'renewed 3 days early so I'd cancel after the charge' and charged 'more than the amount quoted' with no receipt. App Store payment complaints eased a little (11, down from 14) but Google Play payment sits at 1.0 stars. The explicit 'you will be charged today' confirmation step remains the single highest-leverage fix available.

LIVEN

Critical · 2

Largest billing-flow exposure in cohort. Auto-renewal complaints are widespread across Trustpilot and unmanaged channels. Trial-to-subscription transition isn't clearly signalled — structural, not noise.

COURSIV

Critical · 2

Billing-adjacent complaints come from multiple vectors at once — payment surprises and deceptive-advertising complaints both active. BBB shows billing as the dominant complaint type historically.

HEADWAY LEADER

Critical · 2.5

Significant billing-flow exposure despite mature operations. The 'HEADWAY APP IS A SCAM' Apple Communities thread persists, and unexpected weekly-premium charges after a 'free trial' remain the dominant Trustpilot 1-star theme.

Ease of cancellation

RISEGUIDE

Mixed · 4.5

The cancellation guide works for the users who reach it — but new reviews still report being trapped: 'it will not let you cancel... they want to keep stealing your money.' The documentation exists; the problem is purely discoverability. Linking the guide from the in-app billing screen and the store listings would move this criterion without writing a word of new content.

LIVEN

Critical · 3.5

iOS support sentiment netted out negative, and combined with the iOS reply silence, users trying to cancel can't reach support on the largest store.

COURSIV

Critical · 3.5

A third-party site publishes a dedicated 'How to Cancel Coursiv' guide — a clear signal that the native flow has enough friction to create a third-party niche.

HEADWAY LEADER

Watch · 6

Best cancellation infrastructure in cohort: published pre-renewal rule, multiple cancellation paths, no negative support-experience cluster.

UI dark patterns

RISEGUIDE

Critical · 2.3

A small positive this week — one of the two reviews Trustpilot flagged for compliance has cleared. But the underlying pattern the company itself admitted, charging before a stated renewal date, is still live and still generating reviews this week. A cleared flag is housekeeping; the dark pattern that produces the flags is the thing that hasn't moved.

LIVEN

Critical · 2.5

Bug complaints and pricing-flow complaints overlap — the combined cluster is the broadest in cohort. Developer publicly acknowledged manipulative rating prompts but underlying upsell flows still flagged as aggressive.

COURSIV

Critical · 2.5

Deceptive-advertising complaints are a distinctive cohort marker for Coursiv. The quiz-funnel pricing reveal is a textbook dark pattern that consistently surfaces in negative reviews.

HEADWAY

LEADER

Mixed · 4

Lower per-user incidence of dark-pattern complaints than peers. Apple Communities thread about misleading purchase flows persists, but the pattern is softer than what we see at Liven or Coursiv.

Refund policy clarity & enforcement

RISEGUIDE

Critical · 3

Refunds still run on negotiation, not policy — and the inconsistency shows. One reviewer thanked an agent for an instant refund this week; another was offered only '50% as a special favour.' With no refund policy published on the website, every refund is a private bargain whose outcome depends on who you reach. A published policy is the cheapest credibility fix in this dimension.

LIVEN

Critical · 3

Claimed 30-day refund policy is enforced inconsistently — some refunds granted, others refused. With the iOS reply silence, refund threads on the largest store are structurally unanswered.

COURSIV

LEADER

Mixed · 4

Public Money-Back Guarantee exists but requires completing most of the program to qualify — excluding most dissatisfied users. The team engages with negatives but enforces the restriction. Documented policy is a transparency floor.

HEADWAY

Critical · 2.5

No public refund policy. Apple Communities and Trustpilot threads about refund refusals on full-year charges are active. With the iOS reply silence, refund threads on iOS are structurally ignored.

05 Brand Trust & Legitimacy**4.4/10**

Headway leads this dimension at **7.1/10**; RiseGuide sits at **4.4/10** (was 4.4 last week). All four brands held their dimension scores flat this week.

RiseGuide **4.4**Liven **6.4**Coursiv **4.6**Headway **7.1****Company age & history****RISEGUIDE****Critical · 3**

Still young in category, and the only fast lever — a credible founder story — still doesn't exist. The company is roughly two years old and the app about six months. Time fixes this eventually, but right now the sole public record of who runs RiseGuide is a name in business-registration filings, which is not the kind of history that builds trust.

LIVEN**Watch · 6**

Around 4.5 years operating — the second-longest track record in cohort after Headway.

COURSIV**Critical · 3**

Under a year operating, despite already having a six-figure review base. Youngest entity in cohort; review-base-to-age ratio is anomalous.

HEADWAY**LEADER****Healthy · 8**

Six-plus years operating with a recent rebrand and publicly announced IPO plans. Most mature company in cohort by both operating history and corporate sophistication.

Legal & brand identity alignment**RISEGUIDE****Mixed · 5.3**

The durable good news held: the main scam-flagging site stayed out of the top results for a third straight week, the brand's own domain owns 6 of the visible first-page search slots, and one of the two Trustpilot compliance flags cleared. The new wrinkle is a skeptical Reddit thread climbing to the top of 'riseguide reviews' searches — worth watching, but it's a curious user, not a fraud accusation.

LIVEN**Watch · 6**

Corporate entity matches the consumer brand on billing and legal pages. Cyprus address publicly listed. Credibility signals in organic search results, no complaint domains ranking.

COURSIV**Mixed · 5**

Corporate entity matches the consumer brand, but search results show a concerning share of complaint pages — a billing-vector concern. No credibility-domain anchors surface.

HEADWAY**LEADER****Healthy · 7**

Corporate entity publicly disclosed on the homepage with US registered address. Legal pages comprehensive across terms, privacy, AI usage. Forbes appears as a credibility anchor; brand-owned domains dominate first-page results.

Third-party recognition

RISEGUIDE

Mixed · 4.7

The brand's best independent endorsement keeps growing but is losing momentum — the standout creator review crossed 53,000 views (up from 51,000), and the skeptical 'is it a scam?' video stayed flat at 13,000. The catch is a creator-versus-audience split: across sampled videos 73% were positive, but their comment sections ran only 32% positive. The creators are sold; their viewers are still deciding.

LIVEN

LEADER

Watch · 6

A Board of Health Professionals page lists 15+ named PhDs — a distinctive scientific-credibility signal. YouTube coverage is healthy with almost no complaint-framed videos. Crunchbase appears in search.

COURSIV

LEADER

Watch · 6

Listed on Tracxn and Crunchbase, with broad YouTube creator coverage. But organic search results skew complaint-heavy, and there's no editorial press coverage from Forbes, TechCrunch, or peer outlets.

HEADWAY

Mixed · 4.5

Strongest third-party recognition stack: Wikipedia, Endeavor entrepreneur backing, recurring trade press around IPO plans, and YouTube creator coverage unanimously positive.

Leadership transparency

RISEGUIDE

Critical · 3

Flat from last week. The most fixable score in the scorecard stayed unfixed for another week — no founder bio, no About page, no leadership presence anywhere in this week's search results. It's now the longest-running flat criterion in the report. A 200-word bio with a real photo would lift this 2–3 points and quiet the 'who's behind this?' question across every channel.

The longest-running flat criterion in the report. No founder bio shipped this week, no About page, no leadership presence in any search result. Meanwhile a lingering Trustpilot compliance flag keeps the identity question alive. A short, photographed founder bio remains the single most fixable lift anywhere in this scorecard — and it's been available to take for months.

LIVEN

Healthy · 7

Founder publicly named, and an extensive list of health-professional advisors published by name and credential. Leadership identity transparent and verifiable.

COURSIV

Critical · 3

No founders or executives publicly named anywhere — website, registry filings, or LinkedIn. Anonymous-corporate posture despite a very large customer base — a distinctive cohort outlier.

HEADWAY

LEADER

Healthy · 8

Founder is public with extensive media presence — interviews, Endeavor profile, recurring press around the IPO. Strongest leadership transparency stack in cohort.

Online presence consistency

RISEGUIDE

Watch · 6

Where the brand controls the message it's perfectly aligned — the same support contacts appear across the website, both app stores, Trustpilot and business directories. The gap is community presence: Reddit visibility is rising (5 first-page search slots this week) but it skews to skeptical inquiry, which underlines how thin the brand's own community footprint is against an install base above 100,000.

LIVEN

Healthy · 7

Consistent branding across web, app stores, and Trustpilot. Official Health Professional Board page reinforces brand identity. Corporate address publicly displayed.

COURSIV

Watch · 6

Branding consistent across visible channels, but corporate and leadership data largely absent — undermines coherence at the trust layer. Organic search shows a concerning complaint-page share.

HEADWAY

LEADER

Healthy · 8

Wikipedia, Crunchbase, official About-us, press coverage, and store listings all reinforce the same brand and corporate identity. Search results contain the broadest unique-domain set in cohort.

3 IDEAS · NEXT WEEK

Initiatives that would lift the score

01 Publish an About-us page with founder bio

LIFTS: LEADERSHIP TRANSPARENCY · 3.0 → ~5 · Single content page — one photo, four links. Ship by Friday.

Liven publicly names CEO Shahrooz Chowdhury + 15 PhD advisors — scores 7. Headway publicly names founder Anton Pavlovsky with press coverage — scores 8.

How to ship

- 1 Commission a clean headshot of Oleksandr Matsiuk + draft a 2-paragraph bio (background + why RiseGuide exists)
- 2 Publish at riseguide.com/about with photo, bio, and a LinkedIn link
- 3 Link the page from the homepage footer and the App Store / Google Play developer pages

02 Publish an explicit refund + cancellation policy

LIFTS: REFUND POLICY 3.0 → 4+ · EASE OF CANCELLATION 4.3 → 5+ · Policy page + reply templates — text only, no engineering. Ship by Wednesday.

Headway's published 24-hour pre-renewal rule anchors their 6.0 score on cancellation (best in cohort). Coursiv's public Money-Back Guarantee anchors their 4.0 on refund policy.

How to ship

- 1 Write a 1-page policy: **7-day no-questions refund + 24-hour pre-renewal cancel rule**
- 2 Publish at riseguide.com/refunds, link from the footer and every billing email
- 3 Update support reply templates + cross-link from in-app billing + store descriptions

03 Publish a 'How your subscription works' explainer

LIFTS: HIDDEN CHARGES 2.0 → 3+ · PRICE DISCLOSURE 5.0 → 6+ · Support article + email-template update. Text-only, no engineering, no funnel impact. Ship by Wednesday.

Reviewers report surprise at the first payment amount, but the underlying model (introductory discount, then renewal at full price) is industry-standard. The complaint is about clarity of communication, not the pricing itself.

How to ship

- 1 Write a plain-English article: **introductory price + when full price kicks in + how to cancel**
- 2 Publish at support.riseguide.com/how-pricing-works, link from every billing email + App Store description
- 3 Update support reply templates to cite the article URL on every billing-surprise thread
