Marketing vs reality

RISEGUIDE

Watch · 6.3

▲ +0.3

The bite-sized promise keeps holding up where it matters — execution complaints faded this week. Bug-tagged reviews shifted from 100% negative to mostly resolved (8 App Store mentions averaging 3.6 stars, up from 1.0 last week). The one fresh negative signal is creative-side: a Reddit post calling the 'Speak Up Confidently' YouTube ad 'extremely annoying' with 'terrible tone' — a marketing tone complaint, not a product one.

LIVEN

Mixed · 5

▼ -1.0

A new wave of iOS bug complaints emerged — a complaint category that wasn't visible last week.

Trustpilot still rewards the CBT wellness positioning, but app-store sentiment is slipping. Bug and slow-performance complaints are increasingly visible — marketed promise diverging from daily-use experience.

COURSIV

The structured Journey format keeps doing the heavy lifting — 63 App Store reviews this week tagged 'Satisfied users' averaging 4.9 stars, and 14 reviews specifically praising 'Complexity' (meaning low complexity) at 4.8 stars. Use-case reviews land at 4.4 stars across 12 App Store mentions. No competitor or alternative format gets the same density of unprompted praise anywhere in the dataset.

LIVEN

Sentiment on the AI companion (Liven's flagship differentiator) is now visibly split — the core moat is weakening.

The CBT-companion + mood tracker stack is coherent on paper, but reviewers split on whether the AI companion helps or distracts. The differentiator isn't fully landing.

COURSIV

Healthy · 7.5

Accessibility & consistency

RISEGUIDE LEADER Healthy · 7.3 ▲ +0.3 Up from last week. Last week's performance complaint cluster turned out to be a one-cycle blip, not a regression. The App Store performance topic dropped from 12 mentions to 7 this week and the average rating attached to it climbed from 2.8 to 3.0. Whatever caused the spike has resolved on its own — no sprint intervention required. Last week's performance scare was a one-cycle blip, not a regression. App Store performance complaints dropped from 12 mentions to 7 this week, and the average rating attached to that topic climbed from 2.8 to 3.0. Coverage is unchanged: email and the help portal carry everything, no live chat or phone tier. Complaint resolution rate

RISEGUIDE Mixed · 4.3 ▲ +0.3 Down from last week. First reply miss in our tracking — one negative App Store review this week did not get a company response, breaking the 100% streak. Small in absolute terms (1 of 11 negatives unanswered), but the streak itself was the structural credibility. Worth investigating whether it's a missed handoff or a deliberate skip. The 100% reply-to-negative streak broke on App Store this week — 1 of 11 negative reviews went without a company response (90.9%). Google Play actually moved the other direction, climbing to 100% (4 of 4 negatives replied). Initiatives that would lift the score

01 Publish an About-us page with founder bio

LIFTS: LEADERSHIP TRANSPARENCY · 3.0 → ~5 · Single content page — one photo, four links. Ship by Friday.

Liven publicly names CEO Shahrooz Chowdhury + 15 PhD advisors — scores 7. Headway publicly names founder Anton Pavlovsky with press coverage — scores 8.

How to ship

- 1 Commission a clean headshot of Oleksandr Matsiuk + draft a 2-paragraph bio (background + why RiseGuide exists)
- 2 Publish at riseguide.com/about with photo, bio, and a LinkedIn link
- 3 Link the page from the homepage footer and the App Store / Google Play developer pages

02 Publish an explicit refund + cancellation policy

LIFTS: REFUND POLICY 3.0 → 4+ · EASE OF CANCELLATION 4.3 → 5+ · Policy page + reply templates — text only, no engineering. Ship by Wednesday.

Headway's published 24-hour pre-renewal rule anchors their 6.0 score on cancellation (best in cohort). Coursiv's public Money-Back Guarantee anchors their 4.0 on refund policy.

How to ship

- 1 Write a 1-page policy: **7-day no-questions refund + 24-hour pre-renewal cancel rule**
- 2 Publish at riseguide.com/refunds, link from the footer and every billing email
- 3 Update support reply templates + cross-link from in-app billing + store descriptions

03 Publish a 'How your subscription works' explainer

LIFTS: HIDDEN CHARGES 2.0 → 3+ · PRICE DISCLOSURE 5.0 → 6+ · Support article + email-template update. Text-only, no engineering, no funnel impact. Ship by Wednesday.

Reviewers report surprise at the first payment amount, but the underlying model (introductory discount, then renewal at full price) is industry-standard. The complaint is about clarity of communication, not the pricing itself.

How to ship

- 1 Write a plain-English article: **introductory price + when full price kicks in + how to cancel**
- 2 Publish at support.riseguide.com/how-pricing-works, link from every billing email + App Store description
- 3 Update support reply templates to cite the article URL on every billing-surprise thread
